EDUCATION

Bachelor of Technology - Computer Science & Engineering

Expected Graduation: May 2026

Central University of Jammu, J&K

Higher Secondary Education (12th Grade)

Year of Completion: May 2022

A.D.S.V.M Inter College, UP Board

Percentage: 79.2%

Secondary Education (10th Grade)

Year of Completion: April 2020

A.D.S.V.M Inter College, UP Board

Percentage: 85%

EMPLOYMENT HISTORY

DevOps Intern

November 2025 - Present

Wootzapp Pvt. Ltd. (Arakoo) - Remote

- Architected and deployed multi-service AI gateway infrastructure on GKE using Helm, Skaffold, and Terraform with automatic database migrations.
- Engineered double-entry ledger billing system for audit-grade financial tracking, temporal pricing controls, and event-driven worker queue.
Site: scost.arakoo.com

Backend and DevOps Intern

July 2025 - October 2025

Fornax EverUseful Pvt. Ltd - Remote

- Developed backend systems and ETL pipelines using Python and Node.js.
- Integrated AWS services including EC2, DynamoDB, and S3 into continuous deployment workflows through GitHub Actions, reducing deployment times by 25%.
- Configured cloud infrastructure deployments by optimizing resource allocation and autoscaling configurations, resulting in a 35% improvement in system scalability.
Site: amoghconnect.com

Summer Intern

June 2025 - July 2025

Defence Research and Development Organisation (DRDO) - Delhi, India

- Designed and developed AI-powered agents leveraging Machine Learning and Web Scraping techniques.
- Developed automated workflows for real-time analysis of open-source intelligence, reducing manual review time by 30% while maintaining high accuracy in threat indicator identification.

Associate Developer Intern

October 2024 - April 2025

Anuvrittiksha Pvt. Ltd - Remote

- Engineered scalable backend systems and robust ETL pipelines utilizing Python and Node.js, resulting in a 40% reduction in data processing time.
- Integrated AWS native services such as S3, Glue, DynamoDB, Polly, and Transcribe to automate data workflows, increasing operational efficiency by 35% and enhancing system reliability across multiple project modules.
Site: howtoalgo.com

Cybersecurity Intern

January 2024 - March 2024

Acmegrade - Remote

- Conducted comprehensive threat analysis and vulnerability assessments across multiple systems, identifying over 150 potential security risks.
- Implemented advanced security protocols during project execution, enhancing system resilience and preventing an estimated 200 attempted intrusions within the internship period.

Creative Technology Developer Internship

September 2024

Anuvrittiksha Pvt. Ltd. - Remote

- Created technical scripts and engaging animations for DSA tutorials. Enhanced problem-solving, design, and technical communication skills.

TECHNICAL SKILLS

- **Programming Languages:** Python, C/C++, JavaScript, SQL, HTML, CSS
- **Frameworks & Libraries:** Flask, Django, React.js, Node.js, Express.js, Firebase, Hugging Face, Tailwind CSS, N8N Automation
- **Databases:** MySQL, PostgreSQL, DynamoDB, S3, Knex.js (migrations)
- **Cloud & DevOps:** AWS (EC2, Polly, Glue), GKE, Docker, Kubernetes, GitHub Actions, Terraform, Skaffold, Helm
- **Core Concepts:** REST APIs, Microservices, Cybersecurity, Cloud Security, Data Structures & Algorithms

PROJECTS

Personal Portfolio

- Designed and developed a personal portfolio website to showcase projects, technical skills, and professional background.
 - Improved professional visibility by centralizing all projects and achievements.
 - Deployed on infinityfree.com with custom domain integration.
 - **Tech Stack:** React, Tailwind CSS, UI/UX, Infinityfree.com.
- Link: kritensh.fwh.is

Campus Vehicle Access Management System

- Developed a robust number plate detection system to identify number plates from images or video feeds in various lighting and weather conditions.
- Integrated additional features such as vehicle recognition and multilingual support.
- **Tech Stack:** Python, OpenCV, EasyOCR. Available on GitHub.

Tic-Tac-Toe AI

- Created an AI-powered Tic-Tac-Toe game with an unbeatable strategy.
 - Utilized Flask for the backend and deployed it on Render.
 - **Tech Stack:** Flask, AI, Python, Machine Learning, HTML, CSS, JavaScript.
- Link: tictactoe.ai

Book Review Platform

- A modern, responsive design with Tailwind CSS and a comprehensive MERN stack application where users can sign up and review books.
 - Features include user registration and login with JWT tokens, password hashing with bcrypt, and persistent login sessions.
 - **Tech Stack:** Node.js, Express.js, React.js, MongoDB, Tailwind CSS, JWT, Context API.
- Link: bookreviewassign.gt.tc

Autonomous AI Orchestrator

- A simple orchestrator that routes student requests to appropriate educational tools.
- Can be integrated into a chatbot; using NLP it extracts relevant parameters and then selects appropriate tools for better replies.
- Architecture: Orchestrator + intent detection, parameter extraction + validation, tool selection.
- **Tech Stack:** Python, FastAPI, NLP.

CERTIFICATIONS

- IIRS START Program Certification (ISRO)
- Cyber Security Training Completion (Acmegrade)
- Docker and Kubernetes Certification (Udemy)

AWARDS & ACHIEVEMENTS

- Reliance Foundation Undergraduate Scholar 2023
- Secured 2nd Position in Hackaway 2025
- Achieved 5th Rank in IBM TechXchange 2024 (Team: Qi-ages)
